## **Report**

# **On the activities of the energy specialist**

**Annual report for 2025**

**Prepared by: Enerzia Birodalom Kft.**  
1025 Budapest, Berkenye u. 2/b. 1/5.  
**Páll István Tamás**  
Managing Director - Energy Specialist

## **Introduction**

Our company strives to comply with all relevant and current regulations in all areas, including the field of energy.

According to Act LVII of 2015, § 21/B, Government Decree 122/2015 (V.26.), and MEKH Decree 2/2017 (II.16.), from December 21, 2016, any company with an average energy consumption over three years exceeding 400,000 kWh of electricity, 100,000 m<sup>3</sup> of natural gas, or 3,400 GJ of heat energy must employ an independent energy specialist both in terms of employment and corporate law.

The currently effective Act CXXXVIII of 2016, Act LVII of 2015, Government Decree 393/2016 (XII.5.), and Government Decree and 122/2015 (V.26.) stipulate that any business organization with energy consumption exceeding the specified amounts must employ an energy specialist. Our company has been employing an energy specialist since 2017 in compliance with these regulations. Accordingly, we fulfill our obligation by publishing the annual report on the activities of the energy specialist for the year 2025.

Our company submits the data of the annual energy specialist report – in compliance with legal requirements – by the deadline to the Hungarian Energy and Public Utility Regulatory Authority (hereinafter: MEKH) in the prescribed manner.

Our company is committed to social and environmental responsibility. This is reflected in our efforts to reduce energy consumption and thus contribute to nature conservation. Keeping this in mind, we do everything within our financial means to operate in an energy-conscious manner.

This 2025 report provides a summary of our company's energy activities and consumption for 2025. The report includes:

- Energy consumption and CO2 emissions;
  
- Savings from energy investments.

**Annual Energy Consumption Data:**

Energy Consumption (kWh)	16 817 257
Primary Energy Consumption (kWh)	34 356 834
Greenhouse Gas Emissions (tons of CO <sub>2</sub> )	5 314,74

**Planned Annual Energy Savings Achievable through Energy Efficiency Investments:**

Planned Annual Final Energy Savings (kWh/year)	-
Planned Annual Greenhouse Gas Emissions Reduction (tons of CO <sub>2</sub> /year)	-

**Employee Awareness**

We enhance our employees' energy awareness by publishing materials that promote an energy-conscious mindset.
